

SCIENTIFICALLY SUPPORTED FOR AGE-RELATED EYE HEALTH

EyePromise® AREDS 2 Plus with Multi-Vitamin and AREDS 2 Plus Zinc-Free are formulated with the ingredients studied in the National Eye Institute AREDS 2 study plus additional nutrients scientifically supported to support aging eye health.

AREDS 2 CLINICAL RESEARCH STUDY

A multi-center study of 4,203 subjects with intermediate to advanced AMD, ages 50-85 years of age (*Emily Chew, et. al. - JAMA Ophthalmology, 2013*) resulted in:

- AREDS 1 formula along with lutein and zeaxanthin vs. no lutein and zeaxanthin
 - + 10% incremental slowing of progression to advanced AMD
 - + 26% incremental slowing of progression to advanced AMD in the lowest quintile of lutein and zeaxanthin intake, which is more representative of the general population

"EyePromise is a key part of our Center for Macular Health at Gailmard Eye Center... our doctors actively prescribe the EyePromise [AREDS 2 Plus] line of nutritional supplements. The entire program is quite successful for us."

— Neil Gailmard, OD

ENHANCE AND PROTECT
YOUR EYESIGHT.
