

1 in 3 patients
have prediabetes.*

Of those patients, 70% will progress to diabetes.*

It's not a question of **if**
but **when** patients with
diabetes will develop
diabetic retinopathy.**

EyePromise® DVS

EyePromise DVS is a diabetes formula with carefully selected ingredients that have been shown to interfere with several of the primary pathways that lead to diabetic retinopathy and, in combination, have been clinically proven to significantly improve visual function for patients with or at risk for diabetes.

Why DVS?

Serving Size: 2 softgels

All-Natural Zeaxanthin	8 mg
Lutein	4 mg
Vitamin C	60 mg
Vitamin D	50 mcg
Vitamin E	40 mg
Vitamin B12	6 mcg
Zinc	15 mg
Fish Oil	320 mg
Total Omega-3 Fatty Acids A%	240 mg
EPA 40% A%	128 mg
DHA 30% A%	96 mg
Alpha Lipoic Acid	150 mg
Coenzyme Q10	20 mg
Mixed Tocopherols	20 mg
Proprietary Blend	530 mg
Pycnogenol	
Benfotiamine	
Resveratrol	
Grape Seed Extract	
N-Acetyl Cysteine	
Turmeric Root Extract	
Green Tea Leaf

Made with All-Natural Zeaxanthin & Lutein

All-natural zeaxanthin and lutein are critical to protecting long-term eye health in patients with diabetes by reducing the risk of diabetic retinopathy by 66%.*

Highly Potent Proprietary Blend

The ingredients in the DVS diabetes formula have shown significant improvements in retinal health for patients with diabetes by disrupting oxidative stress and promoting cardiovascular integrity:

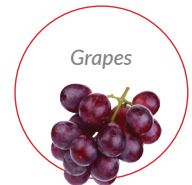

PYCNOGENOL®

Helps reduce vascular endothelial growth factor (VEGF)

BENFOTIAMINE

Crucial for the metabolism of glucose and helps block vascular damage from high blood sugar

RESVERATROL

Reduces oxidative stress, endothelial dysfunction, and cell death

Scientifically Proven Results

The formula for EyePromise DVS was tested in a 2015 human clinical trial published in British Journal of Ophthalmology. Results showed that not only are these ingredients effective at what they are intended to do, but they did not affect blood glucose control.**

These results include:

- MPOD increase of 31%
- Color vision improvement of 21%
- Contrast sensitivity increase of 19%
- Peripheral vision improvement of 12%
- Reduced blood pressure and inflammation
- Reduced LDL-C while improving HDL-C

EyePromise DVS provides an early intervention tool that's clinically proven to help improve visual health and function for any patient with diabetes or prediabetes. It represents a simple, protective strategy in addition to good blood glucose control for protecting the precious sense of sight.
