

A NUTRACEUTICAL FOR OCCASIONAL DRY EYE AND IRRITATION

EyePromise® EZ Tears™ is a daily nutraceutical to help people with occasional dry eye produce more natural tears with a greater level of lubrication to relieve associated eye discomfort and irritation.

OCULAR NUTRITION IMPACT ON TEAR FILM STUDY (ONIT)

A multi-centered, clinic-based dry eye study, ONIT (Mulqueeny, Townsend, Davis, Koffler, et. al. – Advances in Ophthalmology and Visual System, 2015), determined individuals supplementing with EyePromise EZ Tears achieved:

- Ocular Surface Disease Index (OSDI) improvement of 38%.
- Tear break-up time (TBUT) improvement of 45%.
- Conjunctival staining improvement of 50%.
- Corneal staining improvement of 33%.
- Tear meniscus height improvement of 50%.
- Lid inflammation improvement of 40%.
- Rapid relief as early as one week after initiating supplementation.
- Improvements continued over the course of the study.

Serving Size: 2 softgels

Vitamin A	1,000 IU
Vitamin D	2,000 IU
Vitamin E	60 IU
Fish Oil	1,480 mg
Total Omega-3 (TG)	1,100 mg
EPA	590 mg
DHA	440 mg

Proprietary Blend 220 mg

Evening Primrose Oil, Turmeric Root Extract, Green Tea Leaf Extract, Mixed Tocotrienol/Tocopherol Oil

HIGH QUALITY TG FORM OF FISH OIL

EyePromise EZ Tears contains pure, high-potency triglyceride (TG) Omega-3 concentrates obtained from fish oil. The quality fish oil used in EZ Tears is verified by:

- A patented purification process to eliminate heavy metals and other contaminants.
- Certification criteria met by the fishery for sustainability.
- Third party analysis for quality assurance.
- Extremely low oxidation parameters, resulting in a superior sensory profile.
- Processing at a state-of-the-art, pharmaceutical-grade facility.

SUPPORTING VISION FROM THE INSIDE OUT

Omega-3 (TG)	<i>Fatty acids from fish are vital and lacking in the typical diet; significant structural components of tissue cell membranes throughout the body; DHA is rich in the brain and retina and supports healthy vision.</i>
Vitamin A (as Retinyl Palmitate)	<i>Fat soluble vitamin (absorbed by the body with the help of fats) for corneal surface health; mucosal, conjunctival, Meibomian and lacrimal gland health; major importance in the mucous layer of tear production.</i>
Vitamin D₃ (as Cholecalciferol)	<i>Fat soluble vitamin deficient in the American diet; supports immune health, joint health, muscle health, and more.</i>
Vitamin E (as d-Alpha Tocopherol)	<i>Fat soluble vitamin helps support eye health by protecting Omega-3 fatty acid formulas from compounds found in a healthy diet.</i>
Evening Primrose Oil	<i>With GLA (gamma-linoleic acid) – shown to favorably affect symptoms of occasional dry eye.</i>
Turmeric Root Extract	<i>Includes curcumin and is important to support the health of the ocular surface.</i>
Green Tea Leaf Extract	<i>Provides antioxidant effects in ocular tissues to support eye health.</i>
Mixed Tocotrienols/Tocopherols	<i>Important for reducing the effect of compounds that can contribute to occasional dry eye.</i>

"I personally like [EZ Tears] because it contains sufficient quantities of both high quality Omega-3s and GLA. It also contains other anti-inflammatory components that have been shown to help with [occasional dry eye]. We have seen significant improvements in inflammatory levels after beginning this formula."
