

EyePromise®

Your Practice Partner

Co-founded by Dennis Gierhart, PhD, a recognized pioneer of nutritional support for healthy vision, EyePromise® helps people live life to its potential by providing science-based nutritional support to preserve and enhance eye health while making a positive impact on our world.

EyePromise works within three channels, Eye Care Professionals, Direct to Consumer, and Professional Athletes, and is the #1 doctor-recommended eye health nutraceutical brand and leader in technology measuring efficacy. We work closely with our Scientific Advisory Board to facilitate ongoing clinical research into our products and emerging ingredients.

Every EyePromise product is manufactured in the USA in facilities certified by FDA Current Good Manufacturing Practice (cGMP) standards. EyePromise products are the only eye care supplements on the market certified by NSF International.

Tailored Partnerships and Guidelines for Success

EyePromise strives to be the most doctor-supportive nutrition company in the eye care space. We operate as a partner to your practice to help ensure program success for both patients and practice.

EyePromise Program*

The EyePromise Partner Program has many options to prescribe EyePromise nutraceuticals and is designed to be customizable to fit the needs of your practice. The programs include best practices, free marketing materials, and in-practice and online support to ensure your program success.

DISPENSER PROGRAM

This program allows you to pre-purchase product inventory for resale in your practice. This ensures that your patients leave with the product you prescribe. After their initial in-office purchase of either a 1 or 3-month supply, this program also offers the option for EyePromise Auto Refill program. The program helps patients stay compliant with their prescriptions until their next visit and gives both you and your patients customizable options to fit your needs.

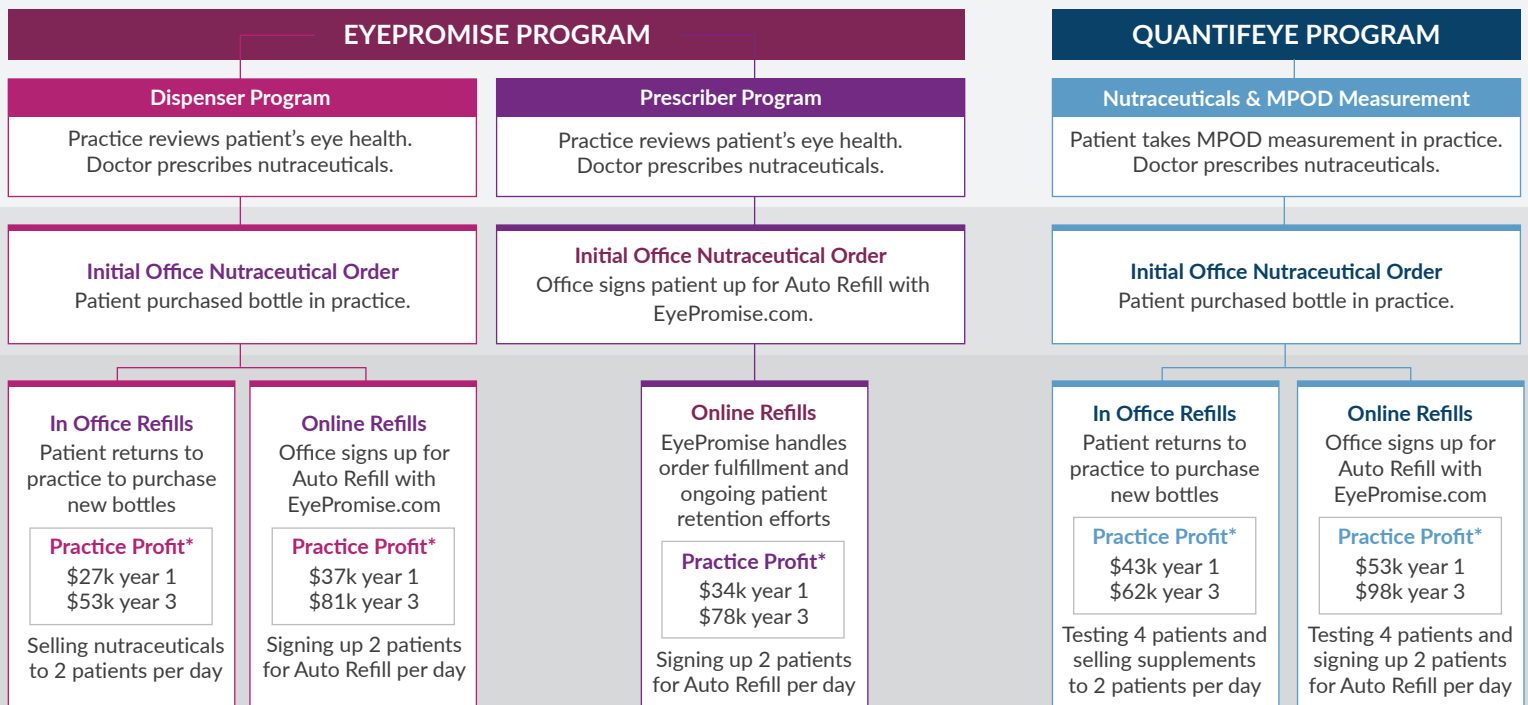

PRESCRIBER PROGRAM

This program allows you to prescribe a product that fits your patients' needs without the hassle of inventory. During the office visit, enroll your patient online in the EyePromise Auto Refill program, and that's it. Patients will then receive automatic shipments of their EyePromise product to help reinforce compliance and increase practice revenue. From here, EyePromise takes care of reminders, education, shipping, and handling. You'll receive referral credits for every patient signed up for Auto Refill in your office and for future bottles purchased.

QuantifEye® Program*

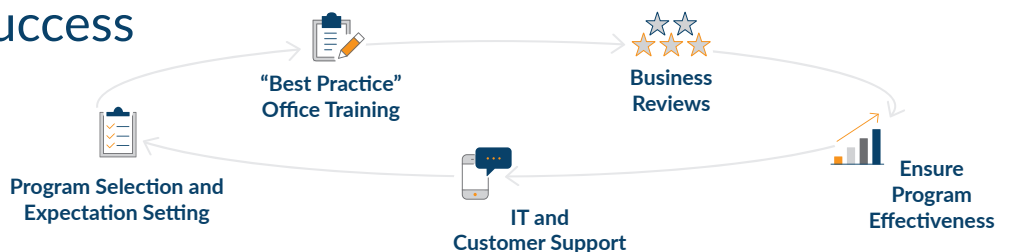

This program includes both nutraceuticals and the QuantifEye MPS II macular pigment optical density (MPOD) measurement instrument. In this partnership, EyePromise provides free marketing materials, maintenance and IT management of the instrument, and online and in-practice support for running the program successfully.

Which Program is Right for You?

Formula for Practice Success

Like our nutraceuticals, our partner process undergoes constant review to ensure your practice receives the best support to help you and your patients.

*based on implementation of in-office best practices and patient compliance/retention data.
