

VISIONARY NUTRITION:

An Improved Formula

As science progresses, so does the Restore formula. Based on cutting-edge research, EyePromise® Restore now includes vitamins B6 and B12, folate, and CoQ10. With higher levels of dietary zeaxanthin and other ingredients proven to support aging eyes, Restore is the best macular health nutraceutical to proactively reduce AMD risk.

As the leading, evidence-based eye health nutraceutical, our flagship formula offers the proactive protection your patients deserve.

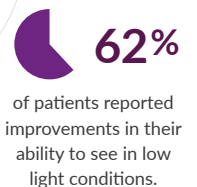

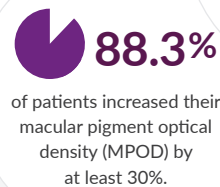

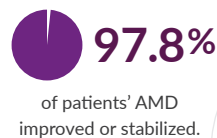

Don't be reactive with eye health. Be proactive with EyePromise Restore.

Serving Size: 1 softgel

Zeaxanthin	8 mg
Lutein	4 mg
Vitamin C	120 mg
Vitamin D3	25 mcg/1000 IU
Vitamin E	40 mg/60 IU
Vitamin B6	1 mg
Vitamin B12	3 mcg
Folate	333 mcg DFE
Folic Acid	200 mcg
Zinc	15 mg
Fish Oil	250 mg
Omega-3	190 mg
Alpha Lipoic Acid	10 mg
Mixed Tocopherols	6 mg
CoQ10	5 mg

Case Report of Dietary Supplements Improving Macular Pigment and Visual Function*

*Based on a 24-month clinical research study (Herman, Kleiner-Goudey, Davis: *Advances in Ophthalmology and Visual System*: January, 2017) with 521 individuals supplementing with EyePromise Restore:

• Improvements were recorded in macular appearance and changes in metamorphopsia.

Why Restore?

Visionary Nutrition

EyePromise pioneered the use of dietary zeaxanthin and Vitamin D for eye health in the original Restore formula. As science progresses, so does Restore. Recent clinical results have proven that Vitamins B6 and B12, folate, and CoQ10 work to reduce the risk of AMD, and these nutrients have since been added to the new and improved EyePromise Restore.

B Vitamins – Collective scientific evidence demonstrates the three B vitamins (B6, B12, and folate) lower homocysteine levels in the blood. Higher homocysteine levels and B vitamin deficiencies have been linked to a higher risk of AMD.

CoQ10 – CoQ10 protects the mitochondria, the power house of retinal cells, which are compromised in those at-risk for or with early AMD. Defective mitochondria are one of the earliest indicators of eye health problems, and oxidation in retinal cells begins with defective mitochondria.

Proactive Eye Health

Best Product by Patient Type: *The Stages of AMD*

At Risk

Early Signs

EyePromise Restore is specifically formulated to preserve and support vision for those concerned with, at-risk for, or in the early stages of AMD.

Intermediate

Advanced

The AREDS 2 study formula slowed the progression of AMD in subjects with intermediate to advanced AMD.

Higher Levels of Dietary Zeaxanthin

As the AREDS 2 study contains 12 mg of dietary carotenoids, EyePromise Restore provides this level of carotenoid protection but mimics the eye's natural 2:1 ratio of zeaxanthin (8 mg) to lutein (4 mg).

EyePromise is the only eye health nutraceutical company that offers these higher levels of zeaxanthin (8 mg), the potent antioxidant chosen by the retina to protect central vision.
